## CONTENTS.

Hysagoge Joannitii in medicina.  
Phylaretus de pulsibus.  
Theophilus de urinis.  
Hippocrates de lege qui et introductorius dicitur [et alia ejusdem].  
Aphorismi Joannis Damasceni.  
Flosculi medicinales ex Cornelio Celso extracti.  
Parabola Arnaldi de Villa Nova addita.  
Libri tres Tegni Galeni.  
Textus duarum primarum Fen primi canonis Avicenne.  
Textus Fen quartæ primi canonis ejusdem Avicenne.  
Textus Fen prime quarti canonis ejusdem qui est de febribus.  
Textus tertie; quartæ; quintæ; Fen quarti canonis ejusdem in chirurgia.  
Cantica Avicenne.  
Textus novi ad Almansorem qui est de aegritudinibus a capite usque ad pedes  
Summula Jacobi de partibus super antidotario Mesue.  
Descriptio ponderum medicinalium et dosium ex breviario Aiscir.

— Articella nuperrime impressa cum quam plurimis tractatibus pristina impressioni super-

**Articella**—continued.

additis, ut patet in pagina sequenti. 403 ff. 16°. [Ad finem:] *Impressum Lugduni per Jacobum Myl impensis honesti viri Constantini Fradin. Anno a Virginis partu mcccix, die quinto mensis Octobris.*

# Astrology.

**ABRAHAM AREN EZRA** [*Abraham Judens or Judeus*]. Incipit liber . . . de nativitatibus. Dixit quoque Abraham Judens: optimum instrumentum ad inveniendum graduum orientem in nativitatibus est astrolabium: quod quanto perfectius fuerit, tanto melius, etc. (l. 19). Explicit feliciter liber Abraham Judei: Utilissimus in ea parte astrologie, quae de nativitatibus tractat: cum figuris exemplaribus singulis domibus antepositis (l. 20). Magistralis compositio astrolabii Hanrici Bate ad petitionem fratris Guillelmi de Morbeka, ordinis predicatorum divini Papae penitentiarii et capellani, etc. (l. 29). Finit feliciter opusculum Abrahæ Judei de nativitatibus cum exemplaribus figuris singulis domibus antepositis: et magistralis compositio astrolabii Hanrici Bate. sm. 4°. Venetiis, 1485.

**ADOLPH** (C. M.) \* Specimen phys. de siderum influxu; respondente Justino Wachtelio. sm. 4°. Lipsiae, [1700].

**ALBOHAZEN HALY**, filii *Abenragel*. Libri de judiciis astrorum, summa cura et diligenti studio de extrema barbarie vindicata, ac Latinitati donati, per Antonium Stupam Rhætum Prægaliensem. Additus est hinc auctor index capitum singularum octo partium sen librorum [etc.]. fol. Basilæ, [1551].

**DE L'ANGÉLIQUE**. La vraye pierre philosophale de médecine, heureusement trouvée par le moyen de l'alliance de sept planettes dominatrices, conservatrices, et protectrices des corps humains, vérifiée par les admirables vertus et effets miraculeux de la confection Angélique. Remède donné du ciel pour la guarison des maladies extrêmes, et pour assenir préservatif contre les ennemis de nostre santé. Avec l'abrégé des expériences d'icelle, sur les maladies extrêmes, et où les remèdes ordinaires n'ont en de pouvoir. 16°. Paris, 1622.

**ASSUERUS** (J.) Dissertatio iatromathematica. In qua de medicinae et astronomie præstantia, deque utriusque indissolubili conjugio disseritur: tum vero ipsa etiam astrologia, quae pars est astronomie (quatenus quidem arti medicæ inserviens, et rationibus physicis, et gravissimorum hominum observationibus, procul omni superstitione, nititur) a contemptu quorundam vindicatur. Editio secunda. 16°. Rostochi, 1629.

**BARTHOLOINUS** (C.) Astrologia seu de stellarum natura, affectionibus et effectibus. Exercitatio qua difficultates præcipue de stellarum definitione, causis, ordine, divisione, quantitate, coloribus, luce et lumine, motu ingenito, distantia a terra, scintillatione; de calore caelestis, influentiis, predictionibus astrologicis, eclipsibus, de maculis lune, via lactea, de stella magis exhibita, de novis nostri sæculi stellis, etc., succincte et nervose expediuntur. Cum indice questionum. Editio sexta. 18°. [n. p.], 1616.

**Astrology.**

BROUGHTON (L. D.) Remarks on astrology and astro-medical botany. 16°. *New York*, [1878, *vel subseq.*].

— Introductory remarks to a pamphlet entitled "Why I am an astrologer", and reply to Richard A. Proctor's article on the "Humbug of astrology", published in the "New York World", Feb. 6, 1887, with criticisms on the "New York World", Mr. Proctor, and Judge John Jay Gordon. 16°. *New York*, 1887.

C. (G.) A treatise of mathematicall physick, or a briefe introduction to physick, by judiciall astrologye, in treating very exactly and compendiously of the nature and quality of all diseases incident to humane bodies by the naturall influence of the celestiall motions. 8°. *London*, 1653.

CARDANUS (H.) Libelli duo. Unus de supplemento almanach. Alter de restitutione temporum et motuum celestium. Item geniture lxxii, insignes casibus et fortuna, cum expositione. sm. 4°. *Norimbergæ*, 1543.

COLLIMITIUS TANSTETERUS (G.) Artificium de applicatione astrologie ad medicinam, deque convenientia earundem, canones aliquot, et quedam alia, quorum catalogum reperies in proxima pagella. 16°. *Argentorati*, 1531.

COOKE (C.) Astrology in a nut-shell. A letter to Mr. Alderman Humphrey on occult phenomena connected with the death of H. R. II. the Prince Consort. 8°. *London*, [1862].

CULPEPPER (N.) Culpepper's astrological judgment of diseases from the decumbiture of the sick, much enlarged. 1. From Aven Ezra by way of introduction. 2. From Noel Duret by way of direction. Wherein is laid down the way and manner of finding out the cause, change, and end of the disease; also whether the sick be likely to live or die, and the time when recovery or death is to be expected; with the signs of life or death by the body of the sick party, according to the judgment of Hippocrates. Whereunto is added a table of logarithmicall logarithmes, to finde the exact time of the crisis. Hermes Trismegistus upon the first decumbiture of the sick; shewing the signs and conjectures of the disease, and of life and death, by the good or evil position of the moon at the time of the patients lying down, or demanding the question; infallible signs to know of what complexion any person is whatsoever; with a compendious treatise of urine. 18°. *London*, 1655.

DARROTT (C.) Dariotus redivivus; or a briefe introduction conducing to the judgement of the stars, wherein the whole art of judiciall astrology is briefly and plainly delivered, by which a determinate judgement may be given upon any question demanded. Written at first by . . . at present much enlarged, and adorned with diverse types and figures, by N. S. Also herunto is added a briefe treatise of mathematical phisick, written by G. C., together with divers observations both of agriculture and navigation, very usefull both for merchants and husbandmen, by N. S. 8°. *London*, 1653.

DE L'ISLE. Des talismans, ou figures faites sous certaines constellations pour faire aymer et respecter les hommes, les enrichir, guérir leur maladies, chasser les bestes nuisibles, destourner les orages, et accomplir d'autres effets merveilleux. Avec des observations contre le livre des curiositez inouyes de M. J. Gaffarel, et un traicté de l'inguent des armes, ou inguent sympathétique et constellé, pour sçavoir si l'on en peut guérir une playe l'ayant appliqué seulement sur l'espée qui a fait le coup, ou sur un baston en sanglanté, ou sur le pourpoint et la chemise du

**Astrology.**

blessé. Le tout tiré de la seconde partie de la science des choses corporelles. 12°. *Paris*, 1636.

FICINUS (M.) De vita cœlitus comparanda. *Florentia*, 1489.

In: HASFURTUS (J.) De cognoscendis et medendis morbis [etc.]. 4°. *Venetis*, 1584, ff. 158-196.

FONTANUS (J.) De astrologia medica liber, in quo ex principiis naturalibus et corpori humano insitis probatur evidentissime vana esse ea omnia quæ astrologi judicarij de hominum moribus, institutis, morbis, crisiibus et illorum morborum curationibus asseruerunt. 18°. *Lugduni*, 1620.

GALEN. Prognostica de decubitu ex mathematica scientia. Liber Galeno ascriptus. Jacobo Antonio Mariscotto Florentino medico interprete.

In: HASFURTUS (J.) De cognoscendis et medendis morbis [etc.]. 4°. *Venetis*, 1584, ff. 119-127.

GANIVETUS (J.) Amicus medicorum; cum opusculo, quod inscribitur: Cœli enarrant; et cum abbreviatione Abrahami Avenezaræ de luminaribus, et diebus criticis. Quibus adjeimus astrologiam Hippocratis. 24°. *Lugduni*, 1550.

— The same. Omnia primum a Gondisalvo Toledo . . . in lucem emissa. Nunc vero demum revisa et utilissimis annotamentis in margine locupletata. 16°. *Francofurti*, 1614.

GOELENUS (R.) Acrotelention astrologicum, triplex hominum genus circa divinationem ex astris in secum producens, falsamque astrologiam a vera, rationibus, exemplis et experimentis distinguens, contra novas eriminationes. Annexus quoque est tractatus integer correctior quam fuit ante Cypriani Leovitii. . . de conjunctionibus magnis, eclipsibus solaribus et cometis, cum eorundem effectuum historica expositione, ob exemplarium raritatem, rerumque et historiarum memorabilium excellentiam hoc loco dignissimus. 4°. *Marpurgi*, 1618.

HIPPOCRATES. Opusculum repertorii pronosticon in mutationes aëris tam via astrologica quam meteorologica uti sapientes experientia comperientes voluerunt, post quam utilissime ordinatum incipit sidere et primo prohemium. [*At end.*] A Petro de Abbano in latinum traducitur. sm. 4°. *Venetis*, 1485.

— De significatione mortis, et vitæ, secundum motum lunæ, et aspectus planetarum, Galileo Mordico interprete prisco.

In: GANIVETUS (J.) Amicus medicorum. 24°. *Lugduni*, 1550, 551-585.

— Hippocratis libellus de medicorum astrologia incipit; a Petro de Abbano in Latinum traductus. [*Venetis*, 1485.]

In: BOVIO (Z. T.) Melampigo [etc.]. sm. 4°. *Verona*, 1595, ff. 86-96.

HODIERNA (J.-B.) Menologia Jovis compendium sen ephemerides medicarum. 4°. *Panormi*, 1656.

— Medicarum elaboratæ ephemerides in sinu Jovis lucidissimo circumgredientium et colludentium. Ad mentis raptum in profundum altissimi opificis contemplationem, exhibitis observationibus sub meridiano xxxvii Palmæ Linculæ. 4°. *Panormi*, 1656.

— Canonum ac tabellarum astronomicarum series, index et usus, ad computandas medicarum longitudoines cum simplicibus, tum et apparentibus; earumque ab invicem latitudines comparandas, vel etiam, pro libitu, ad condendas ac producendas medicarum ephemerides cœlitus jam deducendas. Introductionum, pars tertia. 4°. *Panormi*, 1656.

LEMNIUS (L.) De astrologia liber unus; in quo obiter indicatur, quid illa veri, quid ficti falsique habeat, et quatenus arti sit habenda fides: in quo denique multæ rerum physicarum

**Astrology.**

abditæ amenissimæque causæ explicantur; tum proverbii origo: quarta luna nati.

*In his: Similitudinum ac parabolarum . . . explicatio.* 18°. *Frankofurti*, 1626, 257-288.

LEOVITIVS à LEONICIA (C.) De conjunctionibus magnis insignioribus superiorum planetarum, solis defectionibus, et cometis, in quarta monarchia, cum eorundem effectuum historica expositione. His ad calcem accessit prognosticon ab anno Domini 1564 in viginti sequentes annos. 4°. *Marpurgi*, 1618.

MATH (J. C. G.) Speculum astrologicum. Das ist, Nativität-Spiegel. Worinnen kürzlich und auf das deutlichste entworfen, (1) die Principia nud das Fundament der Astrologie; (2) Wie eine rechte Nativität zustellen, und (3) Wie man sich derselben gebräuchen und zu Nutz machen könne; sammt andern nützlichen und curiösen Sachen so zur Astrologie gehören; nicht nur allein denen Astrologis, sondern auch allen in Erforschung der Natur zu rechten Nutz und ohne Aberglauben bestimnen, theils zur Nachricht, theils zu ferneren Nachdencken, aus gutem natürlichen Grund und Erfahrung, mit Beysetzung der gemein ungründlichen Regeln. 16°. *Frankfurt & Leipzig*, 1693.

MIZALDUS (A.) Harmonia celestium corporum et humanorum, dialogis undecim astronomicæ et medicæ elaborata et demonstrata. 16°. *Frankofurti*, 1599.

PARACÆLUS (A. P. T.) Operum medico-chimicorum sive paradoxorum tomus genuinus primus, etc. 11 v. in 4. 4°. *Frankofurti*, 1603-5.

— The same. Opera omnia, medico-chemico-chirurgica. Ed. novissima. 3 v. fol. *Genève*, 1658.

— The same. Opera, Bucher und Schrifften, so viel deren zur Hand gebracht; und vor wenig Jahren, mit und auss ihren glaubwürdigen eygener Handgeschriebenen Originalien colationiert, verglichen, verbessert; und durch Joh. Huserum Brisingum in zehen unterschiedliche Theil, in Truck gegeben. Jetzt von neuen mit Fleiss überschen, auch mit etlichen bisshero unbekandten Tractaten gemehrt, und umb mehrer Bequemlichkeit willen, in zwey Tomos und Theil gebracht, deren Begriff und Ordnung, nach der Vorrede zu finden, sampt beyder Theilen fleissigen und vollkommenen Registern. fol. *Strassburg*, 1516.

QUERCETANUS redivivus, hoc est, ars medica dogmatico-hermetica, ex scriptis Josephi Quercetani . . . tomis tribus digesta: quorum i. ars medica medicatrix; ii. ars medica auxiliatrix; iii. ars medica practica. Opera J. Schröderi. 3 v. in 1. 4°. *Frankofurti*, 1648.

— The same. Hac autem 2. ed. juxta exemplar Schröderianum revisa variisque in locis correctæ et aucta. 3 v. in 1. 4°. *Frankofurti*, 1679.

SCHOLL (J.) Astrologiæ ad medicinam applicatio brevis; deque convenientia eorundem canones aliquot ex probatissimis quibusque, et astrologiæ et medicinæ, authoribus vigilantissime collecti, restaurati et nunc primum in lucem editi. Post hos fasciculus totius medicinæ sequitur, theses aliquot rei medicæ et maxime simplicioris brevissime complectens, opera et diligentia . . . nuper integritati astronomico restitutus. sm. 4°. *Argentorati*, 1537.

TORRELLA Valentinus (H.) Opus præclarum de imaginibus astrologicis non solum medicis verum etiam litteratis viris utile ac amenissimum. sm. 4°. [*Valentia*, 1596.]

DE TORRES VILLAROEI (D.) Libros en que estan reatados diferentes quadernos physicos, medicos, astrologicos, poeticos, morales, y mys-

**Astrology.**

ticos, quo años passados dio al publico en producciones pequeñas. 2 v. in 1. 4°. *Salamanca*, 1752.

— Respuesta á una carta de D. Joseph Herrando, sobre el atisvo, que van á hacer por el mundo, de el passo de el planeta Venus por el disco solar, los astrologos, que han salido de Paris, Roma, Inglaterra, y otras partes; y de camino escribe de el terremoto de el dia 31 de marzo de este año de 1761, y pone los pronosticos, y señales ciertas, que suelen anteceder á los temblores futuros de la tierra. 4°. *Madrid*, [1761].

— El mercurio celestial y terrestre. Noticias indefectibles de lo que passa en los países altos del cielo, y sospechas prudentes de lo que puede tronar en los baxos de la tierra; son successos, y casos de los que se dexan ver muy de tarde en tarde en el uno, y el otro mundo. Los da á la imprenta . . . [en la] ciudad de Salamanca . . . 4°. *Madrid*, [1762].

HOFMANN (F.) De siderum influxu in corpora humana. *In his: Opus, theol.-phys.-med.* 4°. *Hale*, 1740, 219-247.—P. A. P. Ragionamento academico sopra gl' influssi de' corpi celesti recitato nell' adunanza della colonia Alfica. *In: Dissertazioni e lett. [etc.]*, 8°, *Firenze*, 1750, ii, 103-130.

d'Astros (Léon). Corps étrangers des voies aériennes chez l'enfant. 9 pp. 8°. [*Paris*], *G. Steinheil*, [1890].

— L'hydrocéphalie hérédito-syphilitique. 34 pp. 8°. [*Paris*], *G. Steinheil*, [1891].

Astruc (John) [1684-1766]. Tractatus de motus fermentativi causa novam et mechanicam hypothesin continens. 5 p. l., 177 pp., 1 l., 1 pl. 24°. *Monspeli*, apud *H. Pech Regis*, 1702.

— Mémoire, sur la cause de la digestion des alimens. 24 pp. 4°. [*Montpellier, chez H. Pech*, 1711.]

— Traité de la cause de la digestion, où l'on refute le nouveau système de la trituration et du broiement, et où l'on prouve que les alimens sont digerez et convertis en chile par une véritable fermentation. 9 p. l., 400 pp., 20 l. 12°. *Toulouse*, *A. Colomiez*, 1714.

— Dissertation sur l'origine des maladies épidémiques, et principalement sur l'origine de la peste, où l'on explique les causes de la propagation et de la cessation de cette maladie. 2 p. l., 118 pp., 1 l. sm. 8°. *Montpellier*, *J. Martel*, 1721.

— Dissertation sur la contagion de la peste, où l'on prouve que cette maladie est véritablement contagieuse, et où l'on répond aux difficultés qu'on oppose contre ce sentiment. 6 p. l., 152 pp. sm. 8°. *Toulouse*, *J.-J. Desclassan*, 1724.

Bound with his: Dissertation sur l'origine des maladies épidémiques, [etc.]. sm. 8°. *Montpellier*, 1721.

— A treatise on the fistula of the anus, written originally in Latin; to which are added several valuable pieces upon the same subject, collected from the writings of Fabricius ab Aquapendente, Peter de Marchettis and others, the most celebrated surgeons and operators of their time. Adorned with a copper-plate describing a new instrument for performing the operation on the fistula of the anus when it is incomplete, invented by John Freke. viii, 199 pp., 1 pl. 8°. *London*, *J. Brotherton*, 1738.

— De morbis venereis libri sex; in quibus disseritur tum de origine, propagatione et contagione hominæ affectum in genere: tum de singulorum natura, ætiologia et therapeia, cum brevi analysi et epierisi operum plerorumque quæ de eodem argumento scripta sunt. Editio prima Veneta post tertiam Lugdunensem aucta et emendata. xxxi, 639 pp., 16 l. 4°. *Venetis*, apud *J. M. Lazzaroni*, 1741.

**Astruc (John)**—continued.

— De morbis venericis libri novem. Editio secunda Veneta, post quartam Lugdunensem, auctior et emendatior, in qua addita sunt due dissertationes novæ. 2 v. xx, 590 pp.; 642 pp. 4°. *Venetis, T. Bettinelli, 1748.*

— The same. In hac novissima editioe præter novas duas auctoris dissertationes accedunt epistolæ tres Gerardi L. B. Vans-Wieten, de specifico ab ipsomet invento, et experimentis probato ad prodigandam litem veneream absque pthyalismo; nec non dissertatio cl. viri Josephi Marie Xavierii Bertini de usu interno et externo mercurii ex italico in latinum sermonem conversa. 2 v. xx, 420 pp.; 471 pp. 4°. *Venetis, T. Bettinelli, 1760.*

— The same. 2 v. xx, 423 pp.; 464 pp. 4°. *Neapoli, expensis S. Manfredi, 1768.*

— The same. 2 v. xvi, 362 pp.; 388 pp. 4°. *Venetis, typ. P. J. Gatti, 1790.*

— The same. Traité des maladies vénériennes; où, après avoir expliqué l'origine, la propagation, et la communication de ces maladies en général, on décrit la nature, les causes et la curation de chacune en particulier. Traduit du Latin. 3 v. 16°. *Paris, G. Cavelier, 1740.*

— The same. 4. éd., revue et augmentée de remarques par M. Louis. 4 v. 16°. *Paris, P.-G. Cavelier, 1777.*

— The same. A treatise on the venereal disease; being chiefly designed as a translation and abridgment of the practical part of Dr. Astruc's work. 2. éd., to which are added the improvements with regard to the use of the sassaparilla, mezeron, and sublimate; as, also, an account of Mr. Plenck's method of cure. By Samuel Chapman. xxv (1 l.), 490 pp., 5 l. 8°. *London, W. Owen, 1770.*

— Tractatus therapeuticus. Ed. secunda. 5, 383 pp. 16°. *Geneve, apud Fratres Cramer & Cl. Philibert, 1750.*

— Traité des tumeurs et des ulcères, où l'on a tâché de joindre à une théorie solide la pratique la plus sûre et la mieux éprouvée: avec deux lettres: I. Sur la composition de quelques remèdes, dont on vante l'utilité, et dont on cache la préparation. II. Sur la nature et le succès des nouveaux remèdes, qu'on propose pour la guérison des maladies vénériennes. 2 v. xvii (1 l.), 478 pp.; 454 pp., 1 l. 16°. *Paris, P.-G. Cavelier, 1759.*

— The same. Abhandlung von Geschwülsten und Geschwüren, nebst zween Briefen, worinnen: I. Die Zubereitungen gewisser berühmter Arzneymittel entdeckt und untersucht werden. II. Wo von der Natur und dem Erfolg einiger Mittel wider die geile Seuche gehandelt wird. Aus dem Französischen übersetzt von Georg Ludwig Rumpelt. 2 pts in 1 v. 394 pp.; 15 p. l., 345 pp., 11 l. 12°. *Dresden & Warschau, Gröllischen Buchhandl., 1761.*

— The same. Tractatus de tumoribus et ulceribus solidam theoriam, atque tutiorem praxim complectens. Accedunt epistolæ duæ. I. Circa compositionem quorundam remedium, quorum mirabiles effectus jactant, sed preparationem abscondunt. II. Circa naturam, et virtutem quorundam remedium, quæ adversus litem veneream nuper proposita sunt. Ex Gallico sermone in Latinum versus. viii, 240 pp. 4°. *Venetis, typ. N. Pezzana, 1766.*

— Recueil de plusieurs pièces concernant: Le traité des tumeurs, et des ulcères, et l'extrait qu'on en trouve dans le Journal de médecine de M. Vandermonde. 115 pp. 12°. *Paris, P.-G. Cavelier, 1759.*

— Another copy bound with his: Traité des tumeurs, [etc.]. 16°. *Paris, 1759.*

**Astruc (John)**—continued.

— Traité des maladies des femmes, où l'on a tâché de joindre à une théorie solide la pratique la plus sûre et la mieux éprouvée. 6 v. 12°. *Paris, P.-G. Cavelier, 1761-5.*

— The same. Avec un catalogue chronologique des médecins qui ont écrit sur ces maladies. 3 v. 8°. *Avignon, par les Libraires associés, 1763.*

— The same. 2. éd. 7 v. 12°. *Paris, P.-G. Cavelier, 1770.*

— The same. A treatise on all the diseases incident to women; containing an account of their causes, differences, symptoms, diagnostics, prognostics, and cure. Translated from a manuscript copy of the author's lectures read at Paris, 1740. vi, 480 pp., 1 l. 8°. *London, M. Cooper, 1743.*

— The same. Tractatus de morbis mulierum, solidam theoriam praxi certiori et experientis comprobata complectens. Accedit catalogus chronologicus medicorum, quorum scripta de iis morbis extant. Gallico sermone conscriptus nunc Latino versus. 2 v. xxiv, 388 pp., 1 pl.; viii, 212 pp. 4°. *Venetis, typ. N. Pezzana, 1763-7.*

— Pars altera has additional title: Accedunt dissertationes duæ: altera tenet systema appendicum et vernicularum utriusque dubitationis nonnullas celeberrimi Van Swietenii. Altera perfringit criticas quasdam philologicas animadversiones ad hoc opus, attinentes, quæ in diario literario ann. 1762. repertæ sunt.

— The same. 2 v. xxiv, 388 pp.; viii, 212 pp., 2 pl. 4°. *Venetis, typ. et imp. J. A. Pezzana, 1763.*

— Another copy has two volumes in one.

— L'art d'accoucher rédnit à ses principes, où l'on expose les pratiques les plus sûres et les plus usitées dans les différentes espèces d'accouchemens. Avec l'historie sommaire de l'art d'accoucher, et une lettre sur la conduite qu'Adam et Eve durent tenir à la naissance de leurs premiers enfans. lx, 312 pp. 16°. *Paris, P. Cavelier, 1771.*

— The same. Elements of midwifery; containing the most modern and successful method of practice in every different kind of labour, with a short history of the art of midwifery, and an answer to a casuistical letter, on the conduct of Adam and Eve at the birth of their first child. Translated, with additions and explanatory notes, by S. Ryley. xlviii, 196 pp. 8°. *London, S. Crowder, 1766.*

— The same. The art of midwifery reduced to principles, in which are explained the most safe and established methods of practice in each kind of delivery; with a summary history of the art. Translated from the French original, to which is added an appendix by the translator, containing illustrative remarks on conception and pregnancy, and on those particulars taught by Dr. Astruc, which vary from the methods adopted by the best accoucheurs here. 35, 36, 362 pp., 9 l. 8°. *London, J. Nourse, 1767.*

— The same. Ars obstetricia ad sua principia redacta, tutiorem praxim multiplici partui accommodatam complectens. Accedit hujus provinciarum historia. 96 pp. 4°. [*Venetis, 1767.*]

— Bound with his: Tractatus de morbis mulierum. 4°. *Venetis, 1763-7.*

— The same. viii, 96 pp., 1 pl. 4°. [*Venetis, 1763.*]

— Bound with his: Tractatus de morbis mulierum. 4°. *Venetis, 1763.*

**Atlas** (An) of illustrations of pathology, compiled (chiefly from original sources) for the New Sydenham Society. Fasc. 1-10. fol. London, New Sydenham Society, 1877-95.

Each fasciculus has separate title-page.

**CONTENTS.**

Fasc. 1. Diseases of the kidney. Pl. 1-4, 8 pp., 4 l., 1877.  
Fasc. 2. Diseases of the kidney, supra-renal capsules, and spleen; with pathological summaries. Pl. 5-10, 33 pp., 6 l., 1879.

Fasc. 3. Diseases of the liver. Pl. 11-16, 8 pp., 6 l., 1880.  
Fasc. 4. Diseases of the liver, including one figure of spleen. Pl. 17-22, 52 pp., 6 l., 1882.

Fasc. 5. Diseases of the liver (chiefly of the gall bladder and larger bile ducts). Pl. 23-26, 6 pp., 4 l., 1883.

Fasc. 6. Hydatid disease of liver, pl. 27. Urinary calculi, pl. 28-31, with descriptive letter-press, compiled by Jonathan Hutchinson. 29 pp., 5 l., 1888.

Fasc. 7. Urinary calculi and gall-stones, pl. 32. Enlargement of the prostate gland, pl. 33. Enlargement of the prostate, urinary calculi, etc., pl. 34. Osteitis deformans (Paget's disease), pl. 35, 5 l., 1889.

Fasc. 8. Diseases of brain and spinal cord. Pl. 36-41, 6 l., 1891.

Fasc. 9. Diseases of the testis (pt. 1). Pl. 42-46, 6 l., 1894.

Fasc. 10. The same (pt. 2). Pl. 47-49, 31 pp., 1895.

**Atlas der pathologischen Gewebelehre in mikrophotographischer Darstellung.** Hrsg. von Carl Karg und Georg Schmorl. Mit einem Vorwort von F. V. Birch-Hirschfeld. xviii pp., 27 pl., 27 l. fol. Leipzig, F. C. W. Vogel, 1893.

**Atlas der pathologischen Histologie des Nervensystems.** Hrsg. von V. Babes, P. Blocq [et al.], redigiert von V. Babes und P. Blocq. Lfg. 1, 2, and 4. roy. 8<sup>o</sup>. Berlin, A. Hirschwald, 1892-5.

**CONTENTS.**

Lfg. 1. Die krankhaften Veränderungen der Muskel- und deren Endigungen, [von V. Babes und G. Marinesco]. 39 pp., 8 pl., 1892.

Lfg. 2. Régénération des nerfs, [par C. Vanlair]. Die krankhaften Veränderungen der Nerven nach Amputationen, [von E. A. Homen]. Verschiedene Stadien und Formen der Entartung der Nervenfasern in den Rückenmarkswurzeln, [von Babes]. Verschiedene Formen der Nervenentartung und Nervenentzündung, [von V. Babes und G. Marinesco]. 52 pp., 9 pl., 1894.

Lfg. 4. L'anatomie fine de la moelle épinière, [par S.-R. Cajal]. 35 pp., 8 pl., 1895.

**Atlas of venereal and skin diseases.** Edited by Prince A. Morrow. 1 p. l., iv, 318 pp., 75 col. pl. fol. New York, W. Wood & Co., 1888[-9].

**Atlasoff** (Ivan [Iakovlevich]) [1857-].

Клиническіе матеріалі к изученію мочегонных. Вліаніє наперстянки і калієної солітрі на відвільнені, усвоєніє і обмієніє стшолочєє (калі і натрі) і стшолочєєнік зємел (ізвєсті і магнєзії). ## CONTENTS.

1. [Diagnosis einer contagiösen Krankheit, von D. Stockhamer.]
  2. Kurtze Anleitung zur Austilgung des bedrohlichen Pest-Üebels an die Hand gegeben von einem Pest-Sorger in Wien im Jahre 1713. [von D. Bantschner.]
  3. Gantz kurtzer und deutlicher Ansatze wie sich der gemeine Mann und Arme wider die gegenwärtige . . . Seuch . . . selbst schützen und heilen kann, [von D. von Drahm].
  4. Ausführlicher Bericht wie das Ao. 1713 in der kaiserlichen Residentz-Stadt Wien und dero Vor-Städten grassirende Contagium sich nicht allein in Allem dem bis her gantz Hungarn durchgelauffenen Contagio gleiche, sondern was es vor Signa invadendi, Symptomata und Eventus habe, [von Job. Christoph. Ansfeldt].
- The same. Nach dem Wienerischen Exemplar in folio. 6 p. l., 130 pp. 4°. [*n. p., n. d.*]
- The same. Vier Tractätlein von der ansteckenden Senche . . . Nebst einer Vorrede von einer schädlichen Pest-Mediein, zum Druck befördert von einem Hamburgischen Medico [Gottfried Kirchhoff]. 5 p. l., 130 pp. 4°. *Hamburg, C. Liebrecht*, 1714.

Gründliche und ausführliche Nachricht von der ansteckenden Senche, welche dieses 1713. Jahr in das Ertz-Hertzogthum Nieder-Oesterreich eingeschlichen, samt denen benöthigten Hilfs-Rettungs- und Verwahrungs-Mitteln. Aus dem nieder-österreichischen Gesundheits-Rath. 35 pp. 4°. *Wien, J. van Ghelen*, 1713. [P., v. 763.]

Pest-Beschreibung und Infections-Ordnung. Welche vormalis in besondern Tractaten hrsg., nunmehr aber in ein Merk zusammen gezogen, samt der Anno 1713. zu Wienn in Oesterreich für gewesten Contagium, mit denen dargegen gemacht- und beschriebenen Veranstaltungen, dem gemeinen Weesen zum Besten in Druck befördert. 2 p. l., 92 pp. (12 l.), 94-289 pp., 10 l., 1 pl. fol. *Wienn in Oesterreich, J. Heyinger*, 1727.

Consists of two parts, each with a separate title-page, but having a continuous pagination. The title of the first part is as follows: "Pestordnung, oder der gantzen Gemein nutzlicher Bericht und Gutachten von der Eigenschaft und Ursachen der Pestilenz in genere . . . aus . . . Joannis Guilielmi Mannagetta . . . manuscriptoris genommen, durch . . . Paulum de Sorbait . . . vermehret"; and that of the second part is: "Anderer Theil worinnen die so wohl ausser- als in dem Land Oesterreich 1713. eingeschriebene Senche, gründlich und ausführlich beschrieben, samt denen dargegen verfasten klugen Veranstaltungen deren für gekehrten Hilf- und Rettungsmittel, wie solche von Zeit zu Zeit von Seiner . . . Majestät Caroli VI. vermittels der hierzu besonders angeordneten geheimben Hof-Commission sendt anbefohlen, und von denen in Sanitäts-Sachen nachgesetzten Stellen beobachtet worden." fol. *Wien*, 1727.

The same. 2 p. l., 312 pp., 13 l., 1 pl. fol. *Wien, J. T. Trattner*, 1763.

**Averrhoes**—continued.

at Corduba, in Spain, to Metrodorus, a young Grecian nobleman, student at Athens, in the years 1149 and 1150. Also several letters from Pythagoras to the King of India, together with his reception at the Indian court and an account of his discourse with the King, and his gymnosophists, and his rules and precepts, his account of the power and efficacy of numbers, and magical uses thereof. To which is prefixed a Latin letter by Monsieur Grinan, one of the Messieurs du Port Royal in France, to the ingenious Monsieur Gramont, merchant at Amsterdam, concerning the subject of these papers and how they came to his hands. The whole containing matters highly philosophical, physiological, pythagorical, and medicinal. The work, having been long concealed, is now put into English for the benefit of mankind and the rectification of learned mistakes. 10 p. l., 162 pp. 16°. London, T. Soule, 1695.

Qui venenosa formidas apparatus et pestiferos paves bubones, ecce dicta Avicennæ Arabis. De igne persico pruna vel carbone. De signis ignis persici prunæ vel carbonis. De cura ignis persici prunæ vel carbonis. De althoyu seu antraxe. De signis althoyu seu antracis. De cura althoyu seu antracis. Ordinata, exposita, discussa a rustico medicinæ cultore nuperrime in lucem emissa.

*In*: BAVERIUS (J.) Consilia. fol. *Papiae*, 1521, 16 l. (sig. ai-C, Civ).

Liber canonis totius medicinæ ab Avicenna Arabum doctissimo excussus. A Gerardo Cremonensi ab Arabica lingua in Latinam reductus. Et a Petro Antonio rustico Placentino in philosophia non mediocriter erudito ad humanam ex omni parte ab erroribus et omni barbarie castigatus: necnon a Domino Symphoriano Camperio Lugdunensi fecundis annotationibus terminisque Arabicis et eorum expositionibus

**Avicenna—continued.**

nuper illustratus: nua cum ejus vita a domino Francisco Calphurnio non minus breviter quam eleganter excerpta. 10 p. l., 453 ff. 4°. [*Lugduni, opera Jacobi Myt*], 1522.

Liber canonis de medicinis cordialibus, et cantica, jam olim quidem a Gerardo Carmo-nensi ex arabico sermone in latinum conversa, postea vero ab Andrea Alpago Bellmiensi . . . infinitis pene correctionibus ad veterum exemplarium arabicorum fidem in margine factis, locupletissimoque nominum arabicorum ab ipso interpretatorum, indice decorata, nunc autem demum a Benedicto Rinio Veneto . . . eruditissimis acenratissimisque Incubationibus illustrata. Qui et castigationes ab Alpago factas suis quasque locis aptissime inseruit: et quamplurimas alias depravatas lectiones in margine ingeniosissime emendavit. Et locos, in quibus auctor ipse vel eandem sententiam, eandemve medicamenti unius compositionem iterat, vel oppositas inter se sententias ponit, vel aliquid denique ab Hippocrate, Aristotele, Dioscoride, Galeno, Paulo, Aëtio, Alexandro, Serapione, Rasi, Halyabate, Alsarabio nutuatur, diligentissime indicavit: plurimis etiam arabicis vocibus nunquam antea expositis, latinum nomen invenit: indicemque latinum medicamentorum simplicium in secundum librum composuit. His accesserunt Avicennæ libellus de renovendis nocentis, quæ accidunt in regimine sanitatis; ejusdem tractatus de syrupo acetoso. Ab eodem Alpago ex arabico in latinum sermonem translatus. 3 v., pagæ consecutively. 590 (1 l.), 19 ff. fol. *Venetis*, apud Juntas, 1555. [Index, 1557.]

The same. 21 p. l., 2004 pp., 19 l. fol.
